Architecture**

HOW DO WE DO IT?

1

Business Analysis

Good interaction will turn out when we understand your business. We use our accumulated expertise to grow your business

2

Wireframes

Drawing up a project description and wireframes. At this stage, a lot is changing. Our customers receive a model of their future solution in a clear visual form

3

UI/UX Design and Clickable Prototype

Success begins with a successful design. We prepare mockups in Figma or Zeplin. Also at this stage it is possible to implement a clickable prototype based on mockups in Figma

4

Solution Development

We use the most advanced technologies and innovative approaches to do exactly what you need

5

Communication

Communication is key. Throughout all stages, we are actively communicating and meet with our clients. At least once a week we have a review call to see intermediate results from a bird's eye view

6

Quality Control

Using testing technologies to detect functional and logical errors. Testing solutions on various devices

7

Launch

Project launch, active team work for prompt fixes in online mode of newly received bugs

8

Customer success

Indicators evaluation, project conclusion to profit, success of customers

Cooperation options

A close-up photograph of two hands shaking, symbolizing cooperation or agreement. The hands are positioned on the right side of the image, with the fingers interlaced in a firm grip.

On-Demand (Hourly)

- No min. commitment
- Max. commitment of 20 hours bi-weekly
